Early Electrical Machine Slogans

PRINTED AND MADE IN ENGLAND

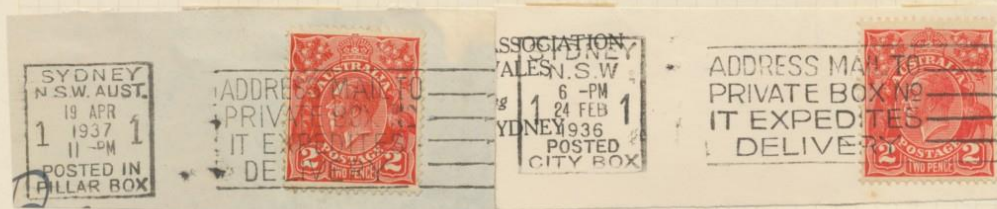

Interstate Slogans:—

From these interstate slogans, which are of similar types to those in use in Sydney it would appear that they are made at the headquarters of the Commonwealth Postal Department in Melbourne.

One would expect that a master die or matrix would be made from which any number of impressions could be taken. Instead every one appears to be either type-set or each block is made by hand as all show differences ranging from minute to pronounced.

In the following pages many of the differences are shown.
